Vynamic™ Cash

Reduce Costs and Losses with Automated Cash Management

Theft, fraud and handling errors are all serious threats to a retailer's bottom line. With cash still the relevant payment method in many countries, how can retailers reduce the cost and risks associated with manual cash handling? Using Vynamic Cash solutions, retailers can automate the end-to-end cash-management process, minimizing expenses and reducing losses.

OPTIMAL CASH LEVELS AT EVERY REGISTER

Seamless payments require optimal levels of cash at each point-of-sale (POS) register, but recycling cash around the business increases costs and raises the risk of losses. By using Vynamic Cash, retailers can increase the operational- and cost-efficiency of the cash-recycling life cycle by automating cash refill, pick-up and balancing. With an intuitive, web-based interface, Vynamic Cash offers a visual display of cash levels across the POS landscape and maintains a clear audit trail for enhanced theft, fraud and error detection.

EFFICIENT CASH-OFFICE MANAGEMENT

Moving cash smoothly and securely between the register, cash office and cash-in-transit (CIT) service demands rigorous checks and balances. Vynamic Cash Office software enables retailers to ensure that cash is transported only when absolutely necessary, reducing the associated risks and costs. Offering tight control and the ability to fully trace deposits, recycling and CIT collections, the solution helps move cash across the business efficiently. Vynamic Cash Office also acts as a service point for cashiers to control the refilling process or clear traditional cash drawers.

ACCURATE REPORTING

To ensure that the cash-management process is working effectively, retailers need a single source of truth for data on cash-recycling efficiency, CIT usage and denomination balances. Vynamic Cash Store Manager software delivers a process-based map of retail cash management, with dashboards for key performance indicators, enabling retailers to highlight and address potential threats or inefficiencies rapidly.

HIGHLIGHTS

Business Benefits

- Ensure optimal cash levels at every POS register, enabling a smooth checkout experience
- Optimize cash transportation—cutting costs and reducing the risk of theft, fraud and handling errors
- Deliver accurate reports on cash-management KPIs across the retail network, helping decision-makers identify opportunities to increase efficiency
- Facilitate regulatory compliance with a transparent audit trail
- Support connected commerce strategies at any cash touchpoint

Vynamic Cash Module POS

- Provide cash-management functionality across the POS landscape
- Optimize cash levels at each point of sale
- Reduce the risk of cash-handling errors and fraud

Vynamic Cash Office

- Enable traceability of cash in:
  - POS registers
  - Note and coin recyclers
  - CIT providers
- Optimize transportation of cash throughout the network
- Ensure secure, dependable cassette and safe-bag handling

Vynamic Cash Store Manager

- Monitor high-level cash-management processes across the retail network
- Visualize cash levels across all in-store recyclers
- Manage all Vynamic Cash users

VYNAMIC RETAIL SOFTWARE SUITE

With over 40 years of experience in retail, Diebold Nixdorf provides a set of comprehensive solutions to accommodate the needs of global retailers, both today and going forward. With the Vynamic Retail Software Suite, we offer a service-oriented software solution that seamlessly supports the entire omnichannel retail flow, including POS transactions, self-service checkouts, mobile consumer apps, payment processing, order management, merchandise management, customer engagement and customer loyalty.

The Vynamic Retail Software Suite is designed on modular principles and can be integrated—fully or partially—into existing retail infrastructures to support consumer touchpoints in multivendor environments. As a result, this software suite is successfully serving customers like Ikea, Tesco, s.Oliver, Uniqlo, Kiabi and other leading global retail organizations.

Diebold Nixdorf also provides a complete portfolio of hardware solutions, including POS systems, cash-management and selfscanning devices and reverse-vending solutions, as well as an experienced service staff in more than 100 countries to support retailers in their business operations 24/7.

WHAT IS DN VYNAMIC?

DN Vynamic is the first end-to-end connected commerce software portfolio in the marketplace. Traversing mobile, ATM, POS, branch, kiosk, and online, DN Vynamic is a system of consumer engagement powered by data and analytics and is cloud/SAAS ready when you are. Built to enable the connectivity businesses of the future require, DN Vynamic extends beyond omnichannel to enable banks and retailers to create seamless, secure, personal connections across the digital and physical channels of today and tomorrow.
