

## 228 EXPRESS CASH RECYCLER

# FOCUS ON THE BUSINESS OF BUILDING RELATIONSHIPS AND IMPROVING THE CONSUMER EXPERIENCE

Offering versatility to meet the needs of any branch design - big or small - Diebold's 228 Express Cash Recycler (ECR) was designed exclusively to meet under counter footprints or standard desk deployments.

### INCREASE YOUR PRODUCTIVITY

Diebold's ECR accepts, verifies authenticity, sorts by denomination and stores cash securely all at the point of transaction. Your tellers will spend more time building customer relationships and less time counting and balancing cash. Now that's time well spent.

### IMPROVE YOUR IMAGE

Teller cash automation provides you the freedom to reinvent your branch by securing cash without the need for a traditional teller line. The sleek, modern design fits anywhere and the advanced technology enables you to offer your customers an efficient and rewarding experience.

### INCREASE YOUR SECURITY

Dramatically reduce cash exposure and teller cash positions at the branch and raise your level of security with Diebold's ECR. Acting as an extension of the vault, the Express Cash Recycler is fully secure reducing the risk of robbery and providing a teller access to only minimal amounts of cash at a time. Mitigate the risk.

### IMPROVE YOUR RELATIONSHIPS

Remove the burden of processing cash while providing more accurate and streamlined cash transactions encouraging tellers to build stronger customer relationships that will result in more profitable business opportunities.

# PROVIDING YOU THE OPPORTUNITY TO TRANSFORM YOUR BRANCH

## FLEXIBLE INTEGRATION

With the obvious flexibility that the ECR offers for branch design, it is also important to consider how it adds flexibility to the teller's role and how seamlessly the system integrates into your network. One of the most stressful aspects of a teller's day is concern over errors and end of the day balancing. Because the equipment performs the counting throughout the day, balancing is much quicker and more accurate. This lessens employee turnover and provides more rewarding career opportunities. Diebold's family of teller automation solutions can be fully integrated into a wide variety of network configurations. Flexible enough to accommodate your existing teller software, the ECR is fully customizable to suit your specific needs.

## FLEXIBLE DESIGN

The small footprint and well-planned structure allows the 228 Express Cash Recycler to slip right under a standard countertop or desk height deployment for greater flexibility in branch design. Its sleek, modern appearance makes it beautifully suited to stand on its own.

Advanced features include a user-friendly, built-in color touch screen display that offers:

- Copy machine-like graphics
- On-screen instructional videos
- Easy to recognize icons and graphics
- On-board diagnostics

## A SOLUTION WITH BENEFITS

- Improved consumer experience which further enhances your brand image
- Increased opportunities for cross-selling and revenue generating tasks
- Reduced teller balancing time and differences
- Increased security with less cash exposure, reduced robbery risk and improved counterfeit detection
- Reduced training costs and teller turnover with the easy to use, intuitive design
- Faster, more accurate cash transactions with reduced customer wait times
- Reduced vault buys and sells with lower teller cash positions
- Simplified cash management and forecasting reduces cross-shipping costs

## SPECIFICATIONS

### SIT DOWN UNIT DIMENSIONS

- Height: 671 mm (26.4 in)
- Width: 440 mm (17.32 in)
- Depth: 910 mm (35.83 in)
- Weight: 316 kg (697 lb) with UL 291 Level 1 Safe
- Contains eight (8) intelligent rolled storage modules
- Meets all the requirements for the Americans with Disabilities Act (ADA) compliance.

### COUNTER HEIGHT UNIT DIMENSIONS

- Height: 940 mm (37.00 in)
- Width: 440 mm (17.30 in)
- Depth: 910 mm (36.00 in)
- Weight: 430 kg (948 lb) with UL 291 Level 1 Safe
- Configurable to support eight (8), ten (10) or twelve (12) intelligent rolled storage modules
