

## 234 SERIES TRANSACTION WINDOWS

# IMPROVED EFFICIENCY AND SECURITY

The 234 Series of drive-up windows allows operators to maintain a personal connection with consumers through visual contact during transactions. The windows also offer a cost effective solution for reducing transaction turn around time and help improve operational efficiency with the option to accommodate one, two or three operations.

### ENHANCED SECURITY

UL-tested, durable, bullet-resistant frames and glass enhances security.

### DESIGN FLEXIBILITY

All models can accommodate current manual and electric transaction drawers, metal undercounter equipment and VAT systems.

### USER-FRIENDLY

All glass installed with a 4-degree tilt outward to reduce glare and reflection.
