

DIEBOLD ACTIVCHECK BULK CHECK ACCEPTOR

MAKE DEPOSITS FAST, EFFICIENT AND VIRTUALLY ERROR FREE.

Today's consumers lead increasingly busy lives. As they become more and more time crunched, they are seeking resources that simplify their day. For banking, they are relying on ATMs to handle a more diverse range of transactions. No longer is the self-service terminal used only to get quick cash. It's now a tool with which to make deposits, pay bills and so much more. This is a significant opportunity for financial institutions that offer technologies that accomplish a wide range of tasks in less time, while minimizing errors. Diebold ActivCheck delivers all of these benefits and more.

PROVIDES SPEED, EFFICIENCY AND CONVENIENCE.

With its four-orientation MICR read, ActivCheck enables customers to make deposits and pay bills with ease. Checks and bill payment documents can be inserted in any manner without complication or service disruption. And, because ActivCheck accepts up to 30 checks per transaction, consumers can complete their banking faster.

ADDITIONAL FEATURES

- Captures high-quality images on both sides of a check
- Displays information for onscreen verification
- Ensures proper processing with double-check detection
- Stores checks securely away from currency

We've got a solve for that.™

ACTIVCHECK ACCEPTS UP TO 30 CHECKS PER TRANSACTION, ALLOWING CONSUMERS TO COMPLETE THEIR BANKING IN LESS TIME.

REDUCE ERRORS WITH ENDORSEMENT RECOGNITION

When an ATM deposit is not endorsed, it creates unnecessary work for both the consumer and the financial institution. ActivCheck solves this issue by recognizing in real time when a check is not signed. Unendorsed checks are returned to the consumer during the ATM transaction. Similarly, ActivCheck holds a check in escrow and returns it when the consumer rejects the transaction, eliminating delays.

MINIMIZE DOWNTIME WITH LARGE 1,000-CHECK CAPACITY.

Financial institutions will appreciate the large capacity of ActivCheck. By storing checks in a high-capacity lockable storage bin, ActivCheck lengthens service intervals for decreased maintenance costs and less downtime. More importantly, ActivCheck allows bank employees to spend more time developing and building relationships with their customers.

PROTECT CUSTOMERS WITH ENHANCED SECURITY FEATURES.

Deepen customer relationships by providing the latest fraud-prevention technologies. ActivCheck boasts enhanced character recognition and magnetic sensory, reducing the risk of accepting photocopied checks.
