

DIEBOLD ACTIVRECYCLE HIGH-PERFORMANCE CASH RECYCLER

DELIVER EXTRAORDINARY FLEXIBILITY, SAVINGS AND CONVENIENCE.

The amount of cash in circulation has risen more than 77 percent in the past five years, according to the European Central Bank. It's no surprise that the costs of cash in circulation - from accepting and verifying to protecting and distributing - have also increased dramatically for the institutions that process it. Some estimate the costs of cash handling as high as \$400 billion worldwide.

EXPERIENCE A HIGH-CAPACITY/ HIGH-FUNCTIONING SOLUTION.

Customers expect their ATM to always have the cash they need for transactions, but keeping ATM cash cassettes filled is not only time consuming for operators, but also inconvenient and expensive. ActivRecycle allows cash to be deposited at ATMs, and then verified, sorted and made almost immediately available for dispensing. It dramatically cuts down the need for tedious and expensive monitoring and refilling - either by cash-in-transit vendors or bank personnel, thus cutting costs. ActivRecycle gives employees more time to handle complex transactions. Customers appreciate more attentive personnel and the ability to make automatic, real-time cash deposits.

CASH-FLOW PROCESS

- Increases customer satisfaction
- Frees employee time
- Boosts overall efficiency for a better bottom line

We've got a solve for that.™

WITH RECYCLING TECHNOLOGY, CASH IN AN ATM IS NEVER "UNSOLD" TO THE CUSTOMER OR OPERATOR, ENSURING SUPERIOR AVAILABILITY.

FLEXIBILITY IS IN YOUR FAVOR.

ActivRecycle supports up to five cassettes (four recycling and one accept-only) that provide 10 storage compartments and can be configured in numerous ways to meet individual needs.

Versatile design - With the use of one cassette as accept-only, the remaining cassettes can be set in any combination of deposit, dispense or recycle.

Multiple denominations - When used with dual acceptance and recycling bins, ActivRecycle can recycle up to eight denominations.

Simple automation - The behavior of each cassette is preset.

Easy access - A split design allows the paper path to be located outside of the safe. This grants convenient access in the event of a paper jam and increases flexibility of servicing.

Large capacity - ActivRecycle provides a 13,100-note storage capacity. The accept cassette can hold 2,300 notes the recycling cassette can hold up to 2,700 notes for a 10,800-note cash capacity. ActivRecycle also features software that supports a 400-note escrow.

Fast and efficient - Operation retains speed of eight notes a second, and the cash pocket accepts and dispenses up to 200 notes.
