

## DIEBOLD CASHGARD DEPOSITORY COMPOSITE SAFE

# THE BEST LINE OF DEFENSE AGAINST THEFT

Diebold's CashGard Depository Composite Safe protects your assets from unplanned events and provides an additional line of defense for branch personnel.

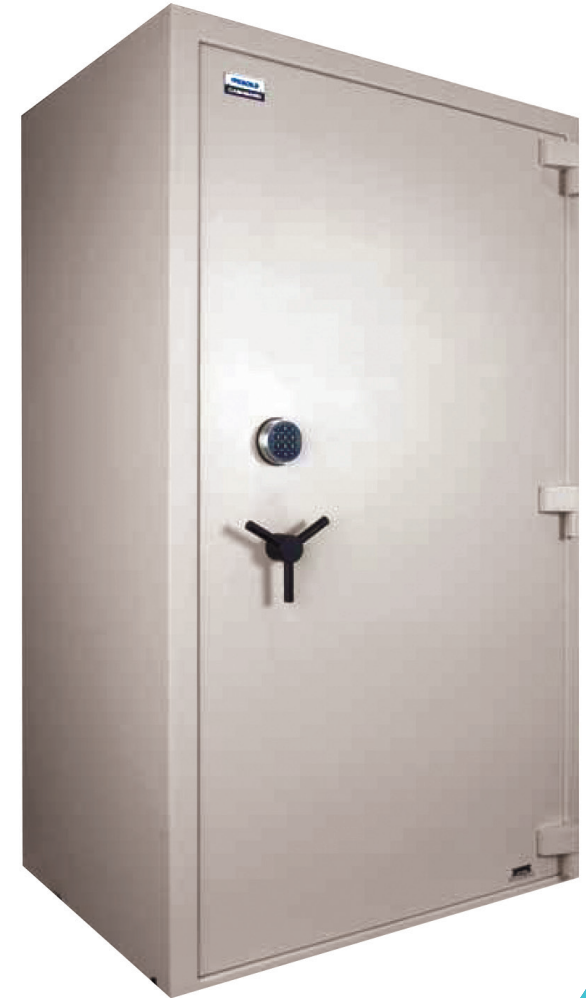

### BUILT TO LAST

- The Diebold CashGard Depository Composite Safe is a composite safe that is comprised of an amalgamated material surrounded by steel-plate inner and outer jackets. This design provides maximum protection while offering shipping weights lower than those of most composite designs.
- Doors are secured by massive chromed locking bolts which are hand activated and seat into individual secure bolt cups.

### CONTROL ACCESS

- Protection Ratings: The Underwriter's Laboratories TL-30 label assures that the CashGard Depository Composite Safe design and locking system have passed a 30-minute timed performance test for burglar resistance.
- All units are designed to accommodate Diebold's rotary Securomatic® and CashGard hopperstyle depository products. Both the safe and depositories are UL-listed. When combined, they offer the finest depository system available.

# THE FINEST DEPOSITORY SYSTEM AVAILABLE

## PROTECTION RATING

Diebold's CashGard Depository Composite Safe product line provides protection from burglary attack. The Underwriter's Laboratories Inc. TL-30 label assures the CashGard Composite Depository design and locking system have passed the 30-minute-timed performance test for burglar resistance.

## UNIQUE BURGLAR-RESISTIVE FEATURES

The Diebold CashGard Depository Composite Safe design allows for a reduced weight-to-volume ratio. The walls are made from high-density composite material surrounded by inner and outer steel-plate jackets. This design provides maximum protection while offering shipping weights lower than those of most composite designs. In addition, doors are secured by massive, chromed locking bolts, which are hand-activated and seat into individual secure

bolt cups. All Diebold CashGard Depository Composite Safe units are designed to resist forced-entry attacks. The handles are designed to shear or break off when the door is closed and an attack is in progress. Also, a deadbolt system prevents the door from being removed during a forced attack.

## ADDITIONAL STANDARD SECURITY FEATURES

- Dual auxiliary spring-loaded relocking device, activated by a punching attack.
- Locks and relocker protected by a large drill-shattering hard plate.
- High strength steel hinges with vertical adjustment.
- Electronic combination lock offering over a million combinations.

## CUSTOMIZABLE OPTIONS

The MasterGard is designed for flexible interior organization. A wide variety of options are available including lockable storage compartments for bulk items, cash trays, teller lockers, and safe deposit boxes on certain models.

## ADDITIONAL OPTIONS:

- Choice of electronic alarm packages, from single door contact to full alarm packages with heat, sound and seismic detection.
- Key-locking handles for flexible day-time protection.
- Wide range of color options.
- Adjustable and/or fixed welded shelf systems.
- A wide variety of mechanical and electronic locks, some capable of IP networking and audit trail activities.
