

REDEFINE THE VITALITY OF THE BRANCH

The accelerating prevalence of technology has changed the role of the branch in a financial institution's strategy. The number of in-branch transactions has declined dramatically, which translates into fewer opportunities for interactions between consumers and branch personnel.

The Diebold 9900 in-lobby teller terminal offers solutions to this challenge by re-engaging the branch customer base effectively and profitably while ensuring efficiency, reliability and security.

Designed for modular flexibility and expandability, a variety of PODs allows for additional functionality to be added on the sides of the base Diebold 9900 unit, keeping your technology relevant and up-to-date. POD transactions include:

DIEBOLD 9900 BASE UNIT

COIN DISPENSER

The Coin Dispenser POD delivers on the need to deliver up to (4) different denominations of coins as part of self-service deposits, transfers, or check cashing. It has a defaulted position to the left hand side of the Diebold 9900 base unit.

ACTIVCHECK™

The ActivCheck (IDMbd) POD delivers the need for self-service check processing in bulk deposits of up to 30 checks. It has a defaulted position to the right hand side of the Diebold 9900 base unit.

ADVANCED FUNCTION DISPENSER (AFD)

The Advanced Function Dispenser (AFD) POD delivers on 4-5 additional cassettes for high speed, self-service cash or ticket delivery. It has defaulted position to the left hand side of the Diebold 9900 base unit.

ACTIVMEDIA™

The ActivMedia POD is a cash and check deposit solution. The ActivMedia module allows for bulk media deposits of up to 75 items. It will process both cash and checks in the same bundle, at the same speed, in any orientation. It has defaulted position to the right hand side of the Diebold 9900 base unit.

DIEBOLD 9900 SERIES FEATURES

PODS represent true modularity and flexibility that offers targeted and relevant solutions to all financial institutions.
