

DIEBOLD CURRENCY MANAGEMENT SERVICES

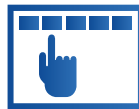

OPTIMIZE THE FLOW OF CASH WITHIN YOUR NETWORK.

Despite the rise in Internet and mobile banking, cash transactions are thriving worldwide. In fact, studies project that cash soon will represent more than 80 percent of global payments. And, with an estimated 75 percent of all dispensing happening in the self-service channel, strategic cash management is critical. However, optimal cash levels can be elusive. Not enough cash frustrates customers and weakens trust. Yet, too much can cost a financial institution thousands in annual interest and lost revenue. Tired of the guesswork? Diebold Currency Management Services eases the burden.

SIMPLIFY CASH MANAGEMENT WITH A TRUSTED PARTNER

Currency Management Services consolidates all of a financial institution's cash-management activities into one place. Diebold tracks, logs and analyzes the physical movement of cash across an ATM network for greater efficiency, as well as tailors solutions to specific branch needs.

HIGH TRAFFIC AREA

An estimated 75 percent of the cash dispensed from an institution occurs through the self-service channel.

We've got a solve for that.™

ON AVERAGE, CASH REPLENISHMENT ACCOUNTS FOR 31 PERCENT OF NETWORK COSTS. REALIZE SIGNIFICANT SAVINGS WITH BETTER MANAGEMENT.

SAFEGUARD ATMS FROM CASH SHORTAGES

With the assistance of historical data, transaction-trend analysis and client-projected usage, Diebold service teams monitor, report and estimate cash loads for each ATM in a financial institution's network. This ensures terminal-specific cash levels and reduces the risk of outages.

ELIMINATE DAY-TO-DAY WORRY

Currency Management Services monitors daily cash levels, automated alerts and currency orders, as well as schedules pickups and

deliveries of currency, deposits and other documents. What's more, this proven software solution works with a financial institution's existing hardware and adapts to any fleet size.

REDUCE THE COST OF CASH

With Mobile Cash Access, customers are sent Smarter cash management dramatically reduces costly out-of-cash occurrences, and predictive replenishment scheduling minimizes CIT costs. Maintaining optimal cash levels also allows for sustained savings over a long period of time when cash is used more profitably.

OPTIMIZE THE BRANCH WITH SMARTER USE OF TELLERS

By outsourcing cash management, financial institutions eliminate time-consuming routine procedures. This frees internal staff to focus on core sales and relationship-building opportunities, and enables more flexible branch operation.
