

## Fleet Management Environmental Policy

Diebold is a global organization committed to environmental excellence. Through its [Global Environmental Policy](#) and everyday commitment to reducing its impact on the environment, Diebold extends this commitment to its fleet team. Diebold is committed to reducing Green House Gas and tail pipe emissions, improving fuel economy, reducing miles driven, and reducing the need for major repairs—all which have an adverse impact on our environment.

To achieve these goals, Diebold and its drivers will:

service vehicles to maintain optimum performance

collect & analyze fleet data

train eco-friendly driving habits

discourage vehicle idling

apply standards to rental cars used for business

encourage employees to observe eco-friendly driving habits

apply best practices in driving techniques

purchase low CO2 vehicles

purchase ISO 14001 compliant vehicles

plan routes
