2.0 Introduction

The information given in this document is based on hardware, BIOS and software used during WN internal test and may change with new releases of BIOS and drivers.

This description is intended only for skilled personnel. Accordingly, pre-requisite to using this description is the adequate technical expertise in software and hardware configuration in the POS field.

3.0 Contents of DOWNLOAD.ZIP

IRTOUCH_Setup_HID_WHQL.exe	Driver installation package
CONFIG.REG	Driver configuration file
README.PDF	This information

4.0 General Remarks

4.1 Features / improvements / highlights

- Made for and tested with:
Windows 7 (32bit), Windows XP (SP3), POSReady 2009, WEPOS and Windows Server 2003 R2
- Screen support via VGA or DVI
- Made for WN display BA82 and BA83 with infrared touch technology
- Released for WN F2std/ulv, G1imp, H1std, G41std motherboards

4.2 Common restrictions / known issues

- No beep on touch possible
- No multi touch (multiple touch screens) possible
- Double click emulation is not implemented
- **This is a interim solution until final release of IRTOUCH driver will be released.**

5.0 Installation / Update Procedure

Simply run executable provided in download.zip

5.1 Customized installation / configuration

You may change settings in config.reg file and import the contents afterwards to Windows registry.
