

MANAGED MOBILITY SERVICES
PREVENTIVE ASSET MANAGEMENT

ENSURE COMPLIANCE
OF UNIQUE CONFIGURED
DEVICES IN ALL
LOCATIONS FOR ALL
REGISTERED USERS.

Businesses and employees are becoming increasingly mobile, producing a large amount of valuable data via connected devices. Enterprise mobility offers a range of unprecedented opportunities but can create countless challenges for IT if not managed properly. Businesses are turning their attention toward maximizing the impact of their mobile fleet and achieving real business value.

An efficient enterprise-mobility strategy plays a decisive role and is the key to business success.

How can you deal with this pressing issue without depleting a significant part of your IT budget? Moving your business-critical operations to a dynamic mobile environment requires a managed solution with the right set of people, processes and technologies to centrally control devices and mobile-computing services in an efficient and secure way.

Diebold Nixdorf Managed Mobility Services covers all services and is tailored to your needs to take full care of your mobile-device fleet and let you benefit from the usage – in a cost-efficient and worry-free way. By taking control, we ensure flawless functionality and empower business operations in a secure, scalable and future-proof way. We manage, monitor and provide the essential analytics enabling you to grow and optimize prime processes.

PREVENTIVE ASSET MANAGEMENT

When moving your business-critical operations to a dynamic mobile environment, keeping track of your devices and ensuring their flawless operation is key to your success. Every device has different hardware and software configurations, operating systems and user settings. Keeping hundreds or thousands of devices up-to-date and working flawlessly creates countless challenges.

With Preventive Asset Management, Diebold Nixdorf controls your mobile devices and ensures that all devices have the right settings and are ready to use — regardless of task, hardware type or operating system — at any location, any time.

Preventive Asset Management provides:

- Worry-free mobile-device management
- All unique device settings, local settings, application libraries and user credentials are stored centrally in a secure private cloud environment
- Monitoring of actual configurations, status and location of each device via periodic heartbeats
- Identified, tested and approved updates on your devices without any risk
- Centralized change-management processes
- Intelligent device management
- Remote deployment of the correct configuration, firmware, OS and application versions to every device

How will you benefit from Preventive Asset Management?

- 95 percent guaranteed uptime in each location
- Up-to-date and ready-to-use devices at all locations
- Freedom and flexibility to optimize your business processes
- Optimized CAPEX

WHY DIEBOLD NIXDORF?

With an installed base of 1 million customer touchpoints in more than 120 countries, Diebold Nixdorf leads the industry in self-service cash systems automation innovations. This positions us to better understand the market needs of today and anticipate those of tomorrow. Leveraging our IP and expertise in cash handling, security and branch automation, we use our knowledge across peripheral markets where self-service efficiencies are emphasized for consumers who desire ease, familiarity and security with their day-to-day transactions— from branch to mobile and beyond.
