

Expand Your Retail Business Across the Globe

The world is changing rapidly and globalization is on everyone's agenda. Retailers look for ways to increase sales revenue by going cross-border. International expansion helps retailers diversify their portfolios and reduce dependency on home markets. The question is how to expand globally while keeping costs and risks to a minimum.

LEGALLY COMPLIANT BUSINESS IN ANY COUNTRY

Fiscal regulations are a major hurdle for companies opening stores in new countries. Thanks to the modular approach in our Vynamic POS solution and based on our many years of global retailing experience, Diebold Nixdorf has developed a set of standard, licensed Country Packages powered by Vynamic POS Localizer. Each Country Package contains all local and fiscal adaptations and translations required to do legally compliant business—in any country you can think of. This lets you rapidly expand without losing control.

ALWAYS UP TO DATE WITH THE LATEST FISCAL LAWS

A Country Package covers all mandatory legal and fiscal requirements, translations, currency and date settings, and more. Optionally, Country Packages can cover the integration with one EFT solution and if applicable, also integrates with one fiscal module. Country Packages are a standard product and maintained as such. This means a Country Package will be automatically kept up to date with the latest changes in legal and fiscal laws. That is one thing less to worry about when going international!

NO LIMITS TO YOUR BUSINESS EXPANSION

The ability to rapidly roll out and efficiently manage new retail operations in any country provides an important competitive advantage. There are no restrictions to the list of countries supported through Vynamic POS Localizer. All countries are treated equally, and in cases where we have no Country Package available, we will gladly develop one as a new standard product. This ensures you'll have all the advantages of working with a standard licensed, regularly maintained solution for each and every country.

HIGHLIGHTS

Business Benefits

- Enter new markets without worrying about legal and fiscal compliances.
- Reduced risks, costs and time to market when entering new countries, as all legally required, country-specific adaptations are provided via a standard software product.
- Always fully compliant and up to date and ready to adapt to changes in legal and fiscal regulations. Country Packages are actively maintained by our development organization.
- Upfront clarity about the costs of going global regardless of the number of POS systems or stores you plan to roll out in a given country, as each Country Package is a standard licensed product.
- Borderless expansion, ensuring you can rapidly expand your business to any country you want.

VYNAMIC RETAIL SOFTWARE SUITE

With over 40 years of experience in retail, Diebold Nixdorf provides a set of comprehensive solutions to accommodate the needs of global retailers, both today and going forward. With the Vynamic Retail Software Suite, we offer a service-oriented software solution that seamlessly supports the entire omnichannel retail flow, including POS transactions, self-service checkouts, mobile consumer apps, payment processing, order management, merchandise management, customer engagement and customer loyalty.

The Vynamic Retail Software Suite is designed on modular principles and can be integrated—fully or partially—into existing retail infrastructures to support consumer touchpoints in multivendor environments. As a result, this software suite is successfully serving customers like Ikea, Tesco, s.Oliver, Uniqlo, Kiabi and other leading global retail organizations.

Diebold Nixdorf also provides a complete portfolio of hardware solutions, including POS systems, cash-management and selfscanning devices and reverse-vending solutions, as well as an experienced service staff in more than 100 countries to support retailers in their business operations 24/7.

WHAT IS DN VYNAMIC?

DN Vynamic is the first end-to-end connected commerce software portfolio in the marketplace. Traversing mobile, ATM, POS, branch, kiosk, and online, DN Vynamic is a system of consumer engagement powered by data and analytics and is cloud/SAAS ready when you are. Built to enable the connectivity businesses of the future require, DN Vynamic extends beyond omnichannel to enable banks and retailers to create seamless, secure, personal connections across the digital and physical channels of today and tomorrow.
