

COMPREHENSIVE SERVICES

CONTENT DELIVERY LOCATION BASED CONTENT/ALL

Content Delivery Service is an ATM screen and promotion content management solution for Diebold Nixdorf ATMs. The Service provides Client with the ability to optimize their ATM performance through custom screen design, ATM advertising and marketing, couponing, and consumer personalization. The Service is available at several Service options at different rates. These allow a Client to:

- Send Welcome, Please wait and Thank you screens to their ATMs
- Design dynamic Theme screens for the consumers at their ATMs
- Advertise a variety of products and/or services by providing the means to present marketing Campaigns that appear at the ATM screen when a consumer uses the ATM
- Print coupons with the ATM receipt to advertise additional services and promotions in conjunction with marketing Campaigns
- Allow consumers to select from various options that will provide personalized ATM screens to consumers on future visits

STANDARD FEATURES

This option allows for the presentation of enhanced consumer screens and functionality on the Client's ATM network. Content delivery to ATMs, consisting of multiple custom Welcome screens, Theme and Campaign, allow Clients to create a unifying design that recurs throughout the screen sequences. The Theme corresponds to the custom graphical appearance of the Client's ATM screens. It includes custom Please Wait and Thank You screens as well as special screen components which create a consistent look for transaction-based screens. When a consumer attempts a transaction, the screen will be displayed on the ATM with the Client's special images overlaying the text-based screens provided by the ATM driving host or network to create custom graphical ATM output screens. The Campaign provides an additional marketing message displayed prior to the Please Wait screen and includes the ability to print a thermal ATM consumer coupon to further enforce the marketing message. It can be a single static screen or an interactive Campaign that asks consumers a question and collects their responses. Responses to Campaigns are collected by the Diebold Nixdorf Content Delivery system and provided to the Client in reports available through Diebold Nixdorf's web-based reporting system.

Client supplied content will be sent uniformly to ALL of the ATMS in the Client / Financial Institution fleet with the same content sent to ALL ATMS.

This option includes one set of Location Based Welcomes, Theme (including Please Wait and Thank You) and Campaign.

- The Welcome – 1 Set which may be comprised of up to 10 rotating screens in English Only
- The Theme consists of:
 - Please Wait – 1 screen in English Only
 - Thank You – 1 screen in English Only
 - Graphical screen components that the Client may use to build enhanced consumer screens from text screens provided by the ATM driving host or network
 - Left and right screen headers
 - Screen background image
 - Screen button

COMPREHENSIVE SERVICES

- Text box
- Campaign – 1 screen in English Only
- Coupon – Provided for one Campaign, optional – No Receipt Logos
- Default Screens – Diebold Nixdorf will not charge additionally for default screens as long as substitutions of content / screens are not done on a frequent basis (interval of every 4-6 months is considered acceptable).
 - **Default Screen Example/Definition:** A default Theme or Campaign displays to a consumer at the ATM when the Campaign Office server is unable to locate a Theme and/or Campaign that has been assigned to that consumer (i.e. No segment based assignment has been specified for that consumer and/or no location based assignment has been specified for that ATM)

Changes are usually not required at the ATM driving host or network legacy connection to display Client's screens.

HOW IT WORKS

Diebold Nixdorf manages the remote download and display configuration and operations. The Client provides the graphic content for the screens and coupons along with the definition of how and when the screens should be delivered and displayed. Connectivity is required between the ATMs and Diebold Nixdorf's network.

Diebold Nixdorf's local screen change (LSC) software must be licensed with the agent software as service items in order to provide HTML content for dynamic screens such as the dollar entry screens.

The program consists of:

- Initial setup (One-time)
- Website access for view and retrieval of reports
- Client Services and Help Desk support
- Continuing service for replacement of Client's content and EDC/EJ Retrieval

The Content Delivery Service allows for the replacement of Client provided content once per calendar month. Depending on the option purchased, this can include a change on a once per quarter basis to each of the applicable Screens and/or coupon(s) content.

REPORTING AND WEBSITE ACCESS

Reporting is available to help the Client analyze performance, pinpoint problem areas and review current content assignments for all options other than the Introductory Screens ALL or VARY options. Diebold Nixdorf Content Delivery reports are provided via SERAS, the Services Electronic Reporting Access System, which is a secure, Internet-accessible reporting system. Reports are available for 90 days and include:

- ATM Master List
- Status of Content Delivery
- Content Assigned to ATMs
- Campaign Response Report
- Most Frequently Used BINs

IMPLEMENTATION PROJECT - DIEBOLD NIXDORF RESPONSIBILITIES

- a. Configuring the System for the option(s) contracted for
 - Define Client ATMs in the Diebold Nixdorf Content Delivery System
