

392 Series Safe Deposit Boxes

Proven Protection. Practical Design.

Protect what matters with a modular Safe Deposit Box system engineered for durability, efficient space planning, and dependable access control. The 392 Series Safe Deposit Boxes combine robust construction with flexible configurations—making it easy to expand, reconfigure, and maintain a professional vault appearance over time.

Flexible Designs

Modular design is pre-engineered for simplified installation, and multiple-size openings and sections provide the most efficient use of space.

Secure Construction

Galvanized steel housing and solid composite doors with a stainless-steel clad finish combine structural strength with long-lasting visual appeal, making them ideal for high-visibility banking environments.

Efficient Installation

Standard sizing and self-aligning design simplify installation, allowing banks to bring vault capacity online quickly for immediate revenue and lasting customer relationships.

MODULAR SECTIONS

- Stackable interlocking sections in five sizes to accommodate most vault heights.
- Self-aligning construction and hinges simplify assembly, ensuring accurate alignment and efficient installation.

CONSTRUCTION

- 1/4" aluminum nosing surrounds the entire nest with galvanized steel outside housing.
- Recessed solid composite doors with a stainless-steel clad finish.
- Brass painted self-aligning Safe-T hinges ensure a solid door fit.
- Brass finished hinges and lock noses.

LOCKS

- UL listed single and double nose locks are available in changeable or fixed configurations to support operational flexibility and long term vault management strategies.

NUMBERING

- Black numbering on gold-colored insert.
- Raised number plate.

DOORS

- Recessed solid composite doors with a stainless-steel clad finish.

SYSTEM OPTIONS**Keys and Locks**

Double-nose UL-listed changeable locks are engineered for on site rekeying, allowing banks to quickly and conveniently reset the lock for a new renter without removing the lock or requiring a service call.

Fixed-key UL-listed locks provide a simple, cost effective, and proven security solution that is ideal for branches with stable renter bases and minimal turnover.

Lightweight Bond Box

Bond boxes are made of durable lightweight polypropylene, which offers excellent durability, heat and impact resistance. Contoured corners won't cut fingers or scratch countertops. The latch requires positive pressure to release, minimizing the possibility of unintentional opening. Bond boxes are designed to carry 35 lbs. of contents.
