

Introducing the Diebold Nixdorf Hopper After-Hour Depository (AHD): the best-in-class solution for customers looking to incorporate a depository into their environment.

Diebold Nixdorf has been producing AHDs for more than 75 years. The Hopper AHD is a competitive and cost-effective hopper-style solution that allows DN to gain a competitive advantage for our customers. The Hopper AHD can be attached to DN commercial UL-rated safes in the field to allow secure deposits. It can also be placed into a wall up to 12" thick.

The Diebold Nixdorf Hopper AHD solution is designed to provide for continuous, seamless, and smooth operation, allowing users to deposit their transactions. The simple, one-hand operation makes it ideal for through-the-wall drive-up or walk-up installations. The DN Hopper AHD is compliant with today's regulations.

THE SECURITY YOU EXPECT

- The hopper-designed depository head accepts bags and envelopes, and is UL listed for resistance to fishing and trapping attacks.
- Dual handle for ease of use and meets or exceeds ADA requirements based on 48" requirement for five-pound push/pull.
- Alarm-tamper switch comes standard in the head. Door contact, thermostat, and vibration detection standard for safe.
- AHD head includes a mechanical lock with 24 keys.
- Hopper head includes a weather-protected envelope storage area.

THE DURABILITY YOU REQUIRE

- A release-action-mechanism bucket design produces a positive sweep of contents to prevent jamming or binding.
- Fascia is constructed with Grade 304 stainless steel and flush-mounted to provide optimum appearance and endurance.
- Stainless steel cladding gives the DN Lobby AHD a timeless appearance to meet any lobby decor.
