

Streamline Cash Delivery and Safekeeping

The Smart Deposit Safe is an intelligent-deposit safe designed to manage large volumes of cash quickly and correctly, so you can mitigate the costs and risks associated with handling cash.

Cash handling is very time consuming and a major cost factor for retailers. Rather than serving customers and keeping lines at the checkout as short as possible, cashiers need to invest time to prepare cash drawers and count cash manually, to maintain compliance with the "four-eyes" principle. Additionally, crediting of revenues or cash supply might be delayed due to unbalanced cash-in-transit intervals.

To manage large volumes of cash we built an intelligent deposit safe to count huge numbers of bills fast and correctly.

Standardized service processes and efficient remote management round off the overall package and ensure that everything stays up and running. Diebold Nixdorf's Smart Deposit Safe is part of the Diebold Nixdorf "Connected Commerce" solution family.

The intelligent deposit safe is automatically logged in to keep all daily business information in a fluent process. The intelligent deposit safe will automatically tally and sort all your bills and also record all your cash-in activities. The intelligent deposit safe defines unique responsibility: Your employees get individualized IDs and user roles. If any kind of problems occurs the responsible user can be identified.

Tech Specs

Usability

- Cash Automation in cash office and at checkout

Flexible and Adaptable

- Different variations for an automated Note deposit-solution
 - with a Note cassette (Capacity: 1200 Notes)
 - with a Note cassette (Capacity: 2200 Notes)

Automatic Note Processing

- Deposit of single bills or bundles of bills
- High acceptance rate > 98%
- Dimensions of accepted banknotes:
 - Width 62–85mm, (2.44"–3.35")
 - Length 120–177mm (4.72"–6.97")
- Safe's bill acceptor reads the bills amount and scans it to detect counterfeits
- Note Tray Capacity: 30 notes (depending on quality and paper thickness)
- Integrated rejected note tray

Essential Benefits for Your Business

- Quick end-of-day balance means employees won't waste time researching adjustments when counted cash and reported receipts don't match.
- Smooth and timely deployment of systems throughout your store/premises network.
- Increased staff safety. Physical trips to the bank are minimized or eliminated, which reduces fraud and employee's potential of being robbed.
- Better use of staff time. Managers who once counted cash can provide value to their employees by assisting employees or customers on the store floor.

System Options

- Bill acceptor
- Electronic lock
- Safe (inside)
- Touchscreen
- Receipt-Printer

Software Options

- Operating System: Linux/Debian
- Application: BeSafe
- Multi-client feature: Deposit multiple users to different cost centers
- Reporting: local and decentralized reports available
- Connection: Remote monitoring included
- Updates: locally and/or remotely (online)

Services Options

Tailored services enable efficient deployment of solutions and the highest possible system availability and security based on the Diebold Nixdorf eServices Platform:

- Global Deployment and Implementation Services: installation and integration into existing environments
- Maintenance Services: fast Recovery and Security Services
- Managed Services: Store Lifecycle Management, Transformational Outsourcing, Consulting Services

Dimensions

Height: 750-1130mm (29½"-44½")
Width: 390mm (15-3/8")
Depth: 650mm (25-9/16")
Weight: 150kg (330 lbs.) approximate
