

Discover the Red Dot Award-Winning Self-Service Solution: DN Series™ EASY eXpress Max

DN Series EASY eXpress Max has been awarded the Red Dot Design Award 2021 for outstanding product design.

The German Red Dot Award: Product Design, which was introduced in 1955, determines the best international products each year. Manufacturers and designers from all over the world can enter their designs in approximately 50 categories. Whether aesthetically appealing, functional, smart or innovative, what the award-winning objects have in common is their outstanding design quality.

What makes DN Series EASY eXpress Max outstanding?

DN Series EASY eXpress Max was created with the small-store format in mind. Fully flexible and customizable, it features best-in-class components in an optimized footprint. DN Series EASY eXpress Max is future-focused and designed to entice, with a 27" or 32" interactive touchscreen that opens up new opportunities to attract and connect with your customers.

What does that mean? Its visual appeal and interactive approach were designed to invite consumers to engage.

To meet the needs of modern consumers, DN Series EASY eXpress Max offers exclusively digital payment methods. Yet its customizable design enables you to add a cash rack underneath, as well as a security scale on the side.
