

Evolve Your Cash Strategy with a Cash Rack that Offers More Flexibility

Retail is changing faster than most retailers can react. Staying ahead of ever-changing consumer demands is a key challenge.

The DN Series™ EASY Cash Rack increases Diebold Nixdorf's solution range. Designed with footprint reduction in mind, it fits underneath a DN Series EASY eXpress and a DN Series EASY eXpress Max, or it can be used as a stand-alone solution. Your organization can easily switch a non-cash solution to a cash solution. The DN Series EASY Cash Rack follows a two-tier cash strategy, which means that, depending on the performance requirements of the particular store, you can actually choose the level of performance and costs of the cash devices within the cash rack. If technological or customer requirements change in the future, you can adapt and change the solutions to meet those requirements. Deploy the right solution for today and benefit from DN Series EASY's scalability and upgradeability to continually adapt your technology to meet the demands of tomorrow and deliver the best TCO.

More Modular

Leveraging one platform with the addition of different modules ensures easy adaptation to changing demands and forms the basis of the DN Series EASY Family. The DN Series EASY Cash Rack is a compact, all-in-one system that combines industrial-grade reliability with state-of-the-art product design. As a more configurable and versatile solution, it delivers on the needs of today while offering the flexibility to deliver in the future.

More Available

Self-service is mission critical for retailers focused on delivering against consumers' demands. Powered by DN AllConnect ServicesSM for Retail, we ensure up to 99.8% availability, allowing for true 24/7 operations. Harnessing real-time remote monitoring and remote incident resolution, our service experts significantly increase availability and drive maximum staff efficiency.

More Open

Openness is the best way to minimize integration efforts and simplify ongoing solution management. DN Dynamic™ Self-Service provides an open, flexible and modular software platform that empowers your organization to tailor the solution that's right for you, to optimize the DN Series EASY Cash Rack within your POS environment.

Technical Specifications

BUILDING BLOCK CONCEPT

- Stand-alone
- eXpress on top
- eXpress Max on top
- BEETLE on top

BASIC SYSTEM UNIT

- BEETLE CPU platform (only for stand-alone variant)

CONSUMER INTERACTION

- User guidance by RGB indicator lighting
- Proximity sensor
- Basket shelves
- Coupon box

TENDER OPTIONS

- 2 tier 'Lite' and 'Advanced' cash options
- Note recycling module
- Coin recycling module

SECURITY FEATURES

- 2 or 4 bagging security scale with different heights and design options
- Self-learning weight database

ATTENDANT INTERVENTION

- Supervisor log-in via magnetic key
- Separate stationary or mobile device

ERGONOMIC AND CUSTOMER-FOCUSED DESIGN

- Fulfills ADA requirements
- All metal parts can be color-coded for any customer-specific color scheme
- Security scale and basket shelf variants are available in left or right configuration and can easily be changed on site

IMPLEMENTATION STRATEGY

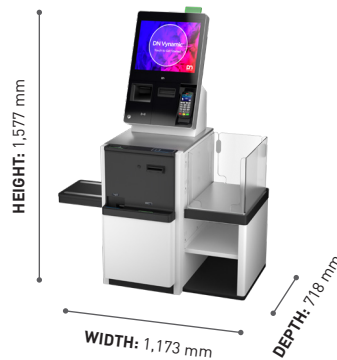

- Integration of cash rack into an operated checkout: BEETLE system on top of a cash rack
- Switch from a non-cash to a cash solution: eXpress or eXpress Max on top of a cash rack
- Several BEETLE, eXpress or eXpress Max systems connected to one cash rack

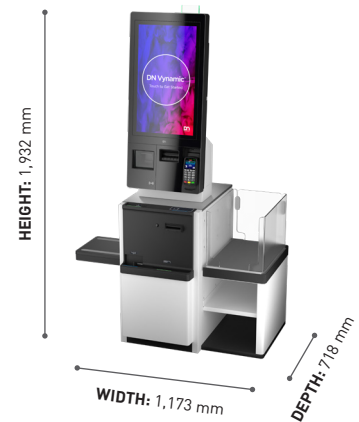

Dimensions

Cash Rack
Height: 860 mm
Width: 480 mm
Depth: 718 mm

eXpress on Cash Rack
Height: 1,577 mm
Width: 1,173 mm
Depth: 718 mm

eXpress Max on Cash Rack
Height: 1,932 mm
Width: 1,173 mm
Depth: 718 mm

The look, dimensions, capabilities or other characteristics of this terminal are subject to continual improvement and change.
