

## DIEBOLD NIXDORF KA12-1 CASH DRAWER

# CASH DRAWER FOR SECURE STORAGE AT POS

DIEBOLD  
NIXDORF

Be it on a simple cash register or an intelligent data POS system, the cash drawer is one of the most important pieces of a POS system. After all, cash, checks, credit card slips and other checkout documents must be stored securely and in sufficient quantities. National, international and sector-specific requirements and the different designs and functionalities of the individual items of POS furniture also have to be taken into account. Diebold Nixdorf's KA12-1 does all this and more, offering retailers a secure, robust cash drawer option.

### DESIGN

Diebold Nixdorf cash drawers are quality products that have proved themselves over many years of use internationally. Our POS cash drawers offer a high degree of security, a robust design, and coin and banknote compartments that can adapt to different size and quantity needs. Our product portfolio offers retailers a range of options to meet their unique ergonomic, space, capacity and functionality requirements.

### AFFORDABLE AND ADAPTABLE

The Diebold Nixdorf KA12-1 compact cash drawer is a low-priced entry-level cash drawer that boasts a large capacity. The width of the banknote compartments can be adjusted to accept different sizes of notes. The coin tray can be removed to reveal an additional compartment for banknotes, checks and documents. The software-controlled cash drawer opens outwards at the front.

### CONNECTION CONCEPTS

The KA12-1 compact cash drawer can be connected directly to the intended cash drawer port of the BEETLE system family and to POS printers with a cash drawer interface (RJ12).

### CASH COMPARTMENT

- Eight large coin compartments / insert (four variable in width) / insert removable
- Four note compartments, variable tray
- Tray for checks, documents (below the coin insert)

## SERVICE OPTIONS

Tailored services enable efficient deployment of solutions and the highest possible system availability and security based on the Diebold Nixdorf AllConnect Services<sup>SM</sup> Platform:

- Global Deployment and Implementation Services: installation and integration into existing environments
- Maintenance Services: fast Recovery and Security Services
- Managed Services: Store Lifecycle Management, Transformational Outsourcing and Consulting Services

## WHY DIEBOLD NIXDORF?

With an installed base of more than 1 million ePOS systems worldwide, Diebold Nixdorf provides leading technologies for automating checkout processes and engaging consumers. Our local presence in more than 130 countries positions us to better understand the market needs of today and anticipate those of tomorrow. We leverage our expertise in seamless omnichannel retailing, store transformation and global delivery excellence, to help retailers achieve their business objectives. We enable a convenient, seamless checkout and shopping experience for consumers who desire consistency across all channels—from store to mobile and beyond.
