

# Fast and Convenient Payment Featuring Bundle Input and Output

Our industry is abuzz with the emerging trend of digital currency as new payment methods such as mobile wallets and bitcoin go mainstream. But what does it mean for cash? Despite the hype of the new technologies, hard currency remains the gold standard for consumers.

Our proven cash-management solutions are driven by expertise in both the financial and retail industries. With the iCASH 30 Diebold Nixdorf is offering a perfectly performing note recycling device for payment applications. It is designed for use in the checkout lane or self-service terminals and provides secure cash takings and payouts, offering total transparency and simplified processes that improve customer confidence and loyalty.

## Designed For In-Store Note Recycling

An iCASH 30 that have been integrated into the checkout lane or self-service terminal allows customers to deposit their payments directly into the note recycling system and then automatically receive their change from the same system. Combined with a coin recycler it can automate your entire cash handling processes at the checkout.

## A Cash Management Solution That Suits Your Needs

The iCASH 30 is a perfect solution for retailers that would like to optimize the cash management in the front office by increasing levels of security in cash processing and reducing operational complexity. We enable retailers to harness the benefits of more efficient and secure cash processes, less administration and minimized operational cost of cash handling.

## A Strategic Solution That Delivers Results

Diebold Nixdorf helps seamlessly deploy cash management systems throughout your store's network. You can easily control iCASH 30 with a JavaPOS driver—part of our standard software platform interface, ProBase Store—or our middleware software, Vynamic™ Cash.

## Features

### APPLICATION

- Automated note processing at the checkout

### FLEXIBLE AND TAILORED SOLUTION

- Recycling of up to three denominations
- One cassette
- Installation variants: front load

### AUTOMATED NOTE PROCESSING
