

## Stay Ahead of Evolving Threats with Security Managed Services.

Today's security measures must reach farther and wider than ever before, as new digital channels join traditional physical channels in delivering financial transactions and interactions that involve sensitive consumer data. New attack vectors are continuously emerging—but the old threats still remain. In this complex, fast-paced environment, it's critical that your security partner understands the landscape and is prepared for threats before they materialize.

Our Security Management Services offer world-class solutions driven by our global experience in physical, data and cyber security. Our comprehensive, integrated approach to securing our clients' data, channels and endpoints ensures the best possible protection every time, everywhere. By shifting the burden of developing, implementing and managing the security strategy for your self-service channel to a trusted partner, you will benefit from reliable, scalable and globally standardized managed processes paired with local expertise.

### **OPTIMIZE SECURITY**

- 24/7 logical attack detection and alerting
- Eliminate threats proactively
- Be in control of emerging risks

### **INCREASE EFFICIENCY**

- Free your staff of the day-to-day management burden
- Streamline processes
- Managed services model provides maximum flexibility

### **MANAGE OPERATIONAL RISK**

- Real time threat insights
- Remote troubleshooting
- Focus on core business initiatives

How do you protect your channel today? Do you have the comprehensive, end-to-end security support your organization needs? As the threats become more global and move more quickly, your network has to be protected by the most up-to-date security measures available.

Our Security Management Services build up on a risk-based approach that's tailored to your unique environment; we offer valuable multilayered protection and real-time insights to ensure your network remains secure, protected and available, while providing the information required for your ATM security audits.

**SECURITY CORE SERVICES**

Security Core Services empower you to focus on your core business instead of worrying about security. Your organization benefits from:

- 24/7 Security Alerting
- USB/External Device Control
- Managed Firewall
- Anti-Malware
- Audit Logging and Retention

**SECURITY ENHANCED SERVICES**

Security Enhanced Services take protection to the next level. We identify users, prevent unauthorized access and protect in real-time against all forms of malware and ensure system integrity through:

- Hard Disk Encryption Services
- Enhanced Intrusion Protection Services

**WINDOWS PASSWORD MANAGEMENT SERVICES**

Windows Password Management Services is a state-of-the-art, cost-efficient solution automating the end-to-end lifecycle management of the local administrator password for each of your self-service devices, and in compliance with PCI-DSS requirements.

**BIOS PASSWORD MANAGEMENT SERVICES\***

BIOS Password Management Services enable the mitigation of some common logical and physical attacks by preventing non-authorized booting from removable devices or changes to the BIOS settings.

**WHY DN ALLCONNECT SERVICES?**

Diebold Nixdorf AllConnect Services<sup>SM</sup> offers industry leading services that provide tailored, end-to-end solutions with a customer first view. We help banks, credit unions and retailers accelerate their performance on a global scale. Using the foundational strength of our top-rated, technically trained service experts combined with data intelligence, we maximize availability and performance of your self-service channel while ensuring always-on compliance and security. From maintenance operations to business solutions to data-driven insights, only DN AllConnect Services delivers the expertise and innovation that help businesses thrive by identifying today's efficiencies and tomorrow's opportunities.
