

The industry's most advanced self-service multivendor software

Built to Connect. Built for More.™

The key to unlocking an ATM's potential is the flexibility of the software powering it. Vynamic Connection Points 6 is an open multivendor software platform that enables financial institutions (FIs) to integrate and connect touchpoints across the self-service network and beyond.

ONE PLATFORM-MORE POSSIBILITIES*

- Compatible with existing systems enabling more personalized interaction with consumers
- Enables connection for more integrated advanced services
- Supports monitoring of events throughout the software stack, and reacts intelligently to provide more availability
- Permits the inventory of components and cash to be accurately tracked for more efficient management of performance and cash levels
- Extensible to existing APIs to facilitate a more future-ready functionality and services to be easily added reusing your current technology
- Empowers deeper system and event data allowing for more secure practices and procedures

VYNAMIC CONNECTION POINTS 6, IN CONJUNCTION WITH OTHER SUPPORT SOFTWARE, OFFERS ESSENTIAL VALUE-ADDED CAPABILITIES:

- Enhanced network uptime so transactions and maintenance are at the highest levels
- Personalized interactions with consumers based on who they are, when they bank and what they like
- Maintaining the fleet's components and cash in real-time, in the right machines, at the best cost

AND, VYNAMIC CONNECTION POINTS 6 LAYS THE FOUNDATION TO EASILY ADD OR UPGRADE FUNCTIONALITY IN ORDER TO ADJUST TO NEW CONSUMER DEMANDS AND REGULATIONS INCLUDING:

- Protecting assets with technology designed to secure inside, outside and all around the ATM
- Empowering new self-service transactions utilizing existing infrastructure or direct to the core
- Bridging the gap between physical and digital banking

* In conjunction with the complete Vynamic Software suite

Out of the box, Vynamic Connection Points 6 comes pre-packaged to satisfy the most commonly used consumer and settlement transactions and functionality that can be deployed “as-is”, including:

- Fully Touchless Withdrawal
- Contact and Contactless identification
- Account information
- Withdrawal, Fast Cash, Customer-Selected Bill Mix
- Dynamic Currency Conversion
- Deposit (Envelope, Cash, Checks, Mixed, Parallel)
- Recycling
- Prepaid top up payments
- Single Balance Print or Display, Print Statement, Mini statement
- PIN Services: Change PIN
- Stamps, Coupons
- Marketing integration
- Marketing Message on Paper Receipt
- Multi-Language, Audio Support
- Secure User and Role-Based Access, Financial Replenishment, Media Replenishment, Diagnostics, Vendor Diagnostics, Terminal Set-up

Vynamic Connection Points 6 is designed for today's modern, open platform environment:

- Designed as a modern WebApp embracing digital technologies such as Angular
- Stateless environment that requires few or no modifications to the host to support new features, devices and transactions
- Windows 10 operating system support for the most up-to-date processing and speed
- Industry-standard protocols, including 91x, NDC, TP.API into Vynamic Platform (dual rail or terminal driving), Custom (e.g. Web Services...) to eliminate vendor-matched software and protocols
- Improved consumer satisfaction due to enhanced stability
- Faster and easier deployment provided by straightforward manageability
- Quicker time to market for new functions due to repeatable, easily extendable development process

By using standard components based on CEN/XFS for all installations, our customers benefit globally:

- Reduction in cost based on economies of scale
- Single application for multivendor hardware models, enabling consistent user experience
