

Basic Anti-Skimming Card Reader

Deliver a new standard of default data security to better protect against today's emerging skimming attacks. The Basic Anti-Skimming Card Reader found in DN Series® brings a foundational level of layered protection to better protect against attacks such as internal, deep-insert skimmers and eavesdropping attacks. This endpoint card reader is designed for quick deployment to low-risk areas.

More Personalized

Illuminated guide lights create an easy transaction flow and user experience.

More Integrated

Built to enable faster and easier certification with common hardware components and platform software.

More Available

Engineered and tested for longer life and handling millions of transactions.

More Efficient

Widest portfolio breadth creates a level of security for every deployment scenario.

More Future-Ready

DN Series® scalable design allows future card reader upgrades, whether moving from dip to motorized or to DN card readers with more security features.

More Secure

Protects against today's and tomorrow's data threats through a layered security approach.

More Sustainable

Built for a greener future: DN Series® minimizes power use, reduces service and CiT trips, and optimizes resources—supporting your sustainability goals at every step.

Features

SPECIFICATIONS

- Track 1, 2, 3 HiCo Read/Write
- EMV Level 1
- Gate Locking Sensors (motorized) or mechanical shutter (dip) ensure correct card orientation and prevent insertion of foreign objects
- Chip-card sensor
- 1 to 4 SAM slots
- Card retract bin (motorized) option available in open, locked, locked & removable configurations – stores up to 30 cards (non-embossed)

SECURITY

Trusted Device Communication

- Protects against eavesdropping on the USB communications and device substitution attacks

Internal Space Defense

- Protects tracks 1, 2 and 3 of card holder data – 3x more than the competition
- Protects against deep insert skimming attacks

Anti-Tapping Defense

- Protects against eavesdropping attacks on exposed electronics

Internal Skimming Recognition (motorized only)

- Prevents insertion of razor-thin internal skimming attacks

RELIABILITY

- Designed for high volume locations
- Engineered to process millions of transactions and card insertions
- Paired with DN AllConnectSM Data Engine

SYSTEM AVAILABILITY

- All DN Series[®] Systems
