

CMD-V6A

Cash & Media Dispenser

Cross-Platform media engines designed to meet today's needs and tomorrow's vision. Offer consumers the best possible self-service experience with our future-ready platform available across the DN Series® family.

The patented CMD-V6A engine is designed as a high capacity cash dispenser today with the ability to upgrade to a recycling engine tomorrow in the same footprint.

More Personalized

Enhance the self-service experience with high capacity cash withdrawal capabilities, offering up to 175% more withdrawal bundle capacity than the competition.

More Integrated

Built to enable faster and easier certification with common hardware components and platform software.

More Available

Engineered with advanced friction pick technology to accommodate all types and quality of notes and media, and paired with DN AllConnect Services™ Architecture.

More Efficient

Dispense other non-media items, such as stamps to automate other transactions and add more value to your self-service fleet.

More Future-Ready

Our modular platform offers the flexibility to meet consumers' demands today, and in the future.

More Secure

Protects against today's and tomorrow's physical, data and cyber threats through a layered security approach.

More Sustainable

Built for a greener future: DN Series® minimizes power use, reduces service and CiT trips, and optimizes resources—supporting your sustainability goals at every step.

Cash Cove Interface

- Up to 110 note bundle per transaction
- Angled and illuminated cash cove for easy user guidance and operation

Cassette Detail

- Up to 4 cassettes
- 340mm, 2,700 note stacking capacity per cassette*
