Maximize Teller Efficiency

Teller automation solutions now enable 90% of transactions to be automated, delivering faster and more convenient transactions at the branch. This frees tellers to focus more on developing relationships and selling financial products.

Fast, fully automated teller systems, like the compact solo + cash-recycling automated teller system, provide reliable, accurate note handling and authentication while expediting service delivery, increasing operational efficiency and boosting cash security within the branch.

The Solo+ is the perfect replacement option for branch re-builds or new construction. Designed with the same cash handling and storage modules as the CS6060, the Solo+ is different in that it is designed for single user applications. This is ideal for high-volume areas where tellers can be more efficient by having a dedicated device. In addition, by incorporating a teller locker in the base for rolled coin or bulk currency along with a lockable teller cash drawer, the Solo+ is a direct replacement for an existing section of under-counter steel.

Utilizing the Solo+ as part of an automated business strategy will allow you an opportunity to free up personnel to focus on more engaging dialogue while keeping everything safe and secure.

Solo +:
6, 8 Rolled Storage Modules

Solo+ Teller Automation System

Features

APPLICATION
- Indoor front-load teller automation system
- Lockable cash drawer and pedestal for loose cash and rolled coin storage

MEDIA TECHNOLOGY

Recycling Module
- Deposit/withdraw up to 200 notes per bundle
- Recycles 4, 6 or 8 denominations as under-counter model
- Operating mode: deposit, withdrawal, deposit/withdrawal, cash recycling
- Transport speed: maximum 5 notes per second for input/7 notes per second for output

Triple-Bay Cash Slot System
- Separate tray for rejects
- Counting and sorting:
  Simple note count
  - Simple / Standard note count
  - Denomination / Orientation sorting
  - ATM count

Note Storage
- Drum modules: 6, 8 drum modules as under-counter model

Banknote Recognition
- Banknote validation as per ECB framework
- Options: fit/unfit test
- Serial number recognition
- Processes up to 128 denominations of up to 4 currencies simultaneously

Data Communication Port
- RS232, USB 2.0 and TCP/IP
- Intelligent operator authentication

PROCESSOR
- Celeron

SECURITY
- Intruder alarm system
- Robbery alarm system
- Security safe - UL291 Level 1

Dimensions

HEIGHT: 955 mm (37.01 in)
WIDTH: 440 mm (17.32 in)
DEPTH: 900 mm (35.43 in)

SOLO+:
6/8 ROLLED STORAGE MODULES

Dimensions (HxWxD)

Solo Short: 6/8 cassettes

955 mm (37.01 in.) x 440 mm (17.32 in.)

x 900 mm (35.43 in.)

Weight

941.37 lb / 427kg
