

Quality You Want. Flexibility You Need.

You don't get a chance to specify undercounter equipment too often. When the time come, you want to ensure you are investing in a well-engineered solution, while still considering the practicality of everyday use. Diebold Nixdorf experts have designed highly efficient, secure work areas to meet your changing business needs.

You get more than hardware with Diebold Nixdorf's undercounter system. You also get the added benefit of our years of experience protecting items of value. We'll help you equip your teller areas for maximum efficiency, security and flexibility.

Modular Flexibility

- Combine pedestals to create highly efficient, secure work areas.
- Expand or relocate areas as business needs change.
- Choose from more than 40 stand-up and sit-down pedestals, plus accessories for managing cash, filing and storing. Diebold can help plan your teller stations to fit your needs.

The Best System for You

- Four preconfigured solutions offer an easier way to create your undercounter system.
- Various applications ranging from banking to retail applications.

Undercounter Equipment

DURABILITY: STANDARD FEATURES/BENEFITS

Independent suspension

Ensures an extremely smooth and quiet drawer glide. Never needs oiling. Guaranteed for the life of the installation.

Separate compartments

Full-depth dividers prevent lost papers, checks, currency.

Double-wall construction

Wrap-around outer walls and full-height inner side walls enhance rigidity.

Powder-coat finish

Resists chips and scratches better than other types of finishes.

Designer hues

Platinum (shown) is one of five standard colors. Additional pre-selected color choices are available. Or let us custommatch a color.

SECURITY: STANDARD FEATURES/BENEFITS

Removable core locks

Simplifies/maintains teller security by allowing the core and lock shell to "follow" the teller to a different post. Eliminates expensive locksmith calls.

One-piece, 1/2"-thick locker door

Attempts at surreptitious entry will show signs of force.

Three-point locker door boltwork

Full 1/2" engagement delivers improved security.

Choice of mechanical or electronic combination locks for locker doors.

All are UL listed.

ADDITIONAL FEATURES/BENEFITS

Cash drop

Cash placed in back of drawer drops into lower locker when drawer is closed. Minimizing the risk of excessive money in the cash tray.

Removable, adjustable base

Lets you meet varying countertop heights and applications. Leveling legs adjust 11/4".

Buses

Undercounter wheeled units let you securely move cash and other valuables from one area to another.

Bill traps

All are UL listed

A detailed cross-section diagram of a cash drawer. It shows the internal structure, including a top tray, a middle tray, and a bottom tray. The drawers are supported by a suspension system with rollers. The diagram highlights the double-wall construction and the independent suspension mechanism.

A diagram showing a cash tray being pulled out of a drawer. A red arrow points to the tray, indicating its removability. The tray is shown in a slightly elevated position, demonstrating how it can be lifted out of the drawer.

- Removable plastic cash trays
- Currency and coin trays
- Adjustable in-drawer filing inserts

Ready-To-Install Stations

Expedite installation when you choose any of our preconfigured install stations featuring the most-used Diebold pedestals.

A photograph of a preconfigured cash drawer station labeled "PPA Station". It features a light-colored cabinet with a dark countertop and a central cash drawer. The station is designed for easy installation and use.

PPA Station

A photograph of a preconfigured cash drawer station labeled "PPD Station". It is similar to the PPA station but has a different internal configuration for currency and coin trays.

PPD Station

A photograph of a preconfigured cash drawer station labeled "PPB Station". It features a light-colored cabinet with a dark countertop and a central cash drawer, with a different internal layout than the PPA and PPD stations.

PPB Station

A photograph of a preconfigured cash drawer station labeled "PPE Station". It features a light-colored cabinet with a dark countertop and a central cash drawer, with a different internal layout than the other stations.
