

# Physical Security Sneeze Guards

Convenience. Access. Protection. Since 1859.

Sneeze guards are acrylic barriers placed at bank teller windows, pharmacy pickup, grocery checkout lines, and a number of other retail environments. Sneeze guards are used as a safety measure to help reduce the spread of viruses between customers and employees.

Physical barriers, like sneeze guards, are recommended in OSHA's [Guidance on Preparing Workplaces for COVID-19](#) which classifies them as an engineering control to protect all essential employees who have face-to-face contact with consumers.

## TELLER STATION GUARDS:
