

Attractive, Custom Furniture Designs Support Branch Transformation Objectives

Diebold's accent furniture solutions transform financial institutions (FIs) and provide an attractive and inviting atmosphere. Offering modern, custom design and innovative features that allow FIs the flexibility to promote a brand and image, Diebold's accent furniture solutions have the quality and appearance of custom millwork. Additionally, the accent furniture line also allows the modularity to move, upgrade or add on without major expense or business disruption.

Flexible Designs

Diebold's accent furniture solutions offer modular designs custom built to the footprint of any financial institution (FI) location

Enhance Security

Diebold's accent furniture solutions separate bank personnel from the lobby via an anti-jump barrier and offer adequate space between transaction areas—ensuring maximum privacy chest.

Innovative Features

Available custom finishes (color laminate, solid surface and granite) allow FIs to transform their locations.

Improved Operational Efficiency

Smartly engineered work areas for tellers, along with space and storage designed with teller tasks in mind, facilitate faster transactions.

Designs for a Seamless Branch Transformation

DIEBOLD ACCENT FURNITURE SOLUTIONS

Well-suited for branch transformation initiatives, Diebold's accent furniture solutions are custom built to fit any area. From complete workstations to individual components, Diebold's specialized manufacturing ensures precise specifications, uniform fit and consistent appearance, whether FIs are furnishing a single facility or hundreds of branches.

BUILT WITH SECURITY IN MIND

- Designs facilitate verification of a customer's identity
- Designs ensure maximum privacy for tellers and customers
- Barrier separates teller area from lobby
- When coupled with bandit barrier, tellers are completely shielded from lobby

ADA COMPLIANCE

All accent furniture solutions comply with the Americans with Disabilities Act for height, width and reach-over requirements for customers and employees.

Features

- Privacy headsets that allow operators and customer to discuss confidential information without relying on speakers
- Wired headsets with built-in sound conditioning functionality and volume, muting and headset-selector controls
- Attractive, custom design
- Quick design and installation
- Consistent atmosphere across multiple branch locations/ layouts
- Potential LEED point achievement
- Designs that can be configured to any area
